

Meet Mat Man

2 - 6 years

Drawing is the trace of movement. Through play, children discover the relationship between how they move and the marks they make. They begin with shapes and lines, and progress to drawing the sun, trees, and people.

Young children often wish to draw pictures of themselves or a person. Mat Man helps make drawing easier as it supports their understanding of body part placement while having fun.

Ultimately, Mat Man activities help children develop body awareness, drawing and counting skills.
