Sensory Fun for One's

12 - 23 months

Sensory Fun for One's is an interactive group experience for parents and their children. We will explore textures, smells and tastes with a variety of materials.

Young children learn through the use of all of their senses. Children learn very little about an orange just by looking at a picture. But when they are allowed to touch, roll, squeeze, smell and of course, taste an orange, they are well on their way to true understanding.

This program will also include a circle time with songs and stories, interactive activities and a nutritious snack.

Parents discover and explore ideas that will assist them in enhancing their role as their child's first and most important teacher.
